

Thursday, November 19th - 7:30 pm Eastern Time  
**Dampp-Chaser Piano Life Saver Systems - Installing the Piano Life Saver System**

**[Register Here](#)**

**Kelly Hollifield**

There's a right way and a wrong way to do any task. Installing a Piano Life-Saver System requires adhering to the RIGHT way for the system to work properly and the customer to be happy. Learn why and how in this informative presentation. We will explore and explain the many different configurations of grand pianos and uprights.

---

Coming in January and February 2021

## **USE YOUR TOOLS**

**A seminar series exploring ways Aural and ETD methods can improve your skills as a Piano Technician.**

I am still seeking seminar instructors for this series. Send your seminar outline to [SERVP@ptg.org](mailto:SERVP@ptg.org) or call me 770.778.6881.

**Join us!** As SERVP, my focus, "**promoting quality service for the world's pianos,**" is to provide all technicians the means to learn, achieve, and provide quality service. No one ever knows everything about our profession, yet together we have amazing expertise. We all benefit when we discover better ways of accomplishing tasks of the trade. This discovery is the purpose of Southeast Seminars. All technicians will benefit from this presentation and should plan to participate. It is my privilege to host Southeast Seminars, bringing these educational opportunities to you, a core function of PTG.

Come and **share your expertise**. Please help us expand knowledge, improve skills, and share experience! Find a day, any day that works for you, and schedule a ZOOM technical presentation. Don't let this COVID bug win! I KNOW there are other folks with the

means and where-with-all to put on a Zoom class. Education is the key to advancement. It is also the key to self-improvement, and continuous improvement is a foundational element of PTG.

Southeast Seminars is for all of us.

**LET'S DO THIS!!!**

Contact Bill Davis, SERVP [HERE](#), and schedule a ZOOM Seminar.
